GOLDEN MOUNTAIN TECHNOLOGY SARL

WELCOME TO OUR COMPANY

We are dealers in gold mining, diamond mining, cobalt, coltan and copper cathode mining company in the Democratic Republic of Congo with many mines and operations.

We export gold, diamond, copper cathodes, coltan, cobalt and iron ore.

We mainly produce Gold and Copper cathode, we have had investments from companies in the UAE, Philippines and Korea.

Our copper cathode production line still looking for a partner ship to extend our production capacity, we have ability to produce 12,000MT per month of Copper cathode recently. But we will try to extend our production ability when we have enough funds for copper ore extraction.

THE CHAIRMAN

We are delighted to offer you a business investment opportunity in our company. As a fully registered and licensed mining company, we offer you unlimited opportunities for investment.

We have operational mines, machinery and a dedicated workforce that make the company run.

We are open to new investor willing to do business with us.

Mr Gabi Yakabwe Mbo

C.E.O and Chairman

Email: gabiyakabwe@goldenmountain-tech.com

GOLD

We have mining right in the country. we have many working mines that are in full production. We have mines in Lubumbashi and other Congo provinces where there are gold ores. We have gold mining machines and gold smelting technology.

The gold mining industry of the Democratic Republic of the Congo is a significant factor in the world's production of gold and gold ore. We produce and export gold to Europe, Qatar gold shops, UAE gold dealers, Iran gold stores and the United States of America gold dealers.

COPPER PRODUCTION

We have working copper mines and a copper processing factory. that are in full production. We have mines in Lubumbashi and other Congo provinces.

We do copper concentrate undergoes refining via one of a few processes. The least common method is cementation, in which an acidic solution of copper is deposited onto scrap iron in an oxidation-reduction reaction. After enough copper has been plated, the copper is then further refined. We export copper cathodes in metric tonnes

DIAMONDS

Our country holds about 9% of the world's known diamond reserves and most of it is still unexplored. We are seeking partners to mechanize diamond production for full benefits.

COBALT

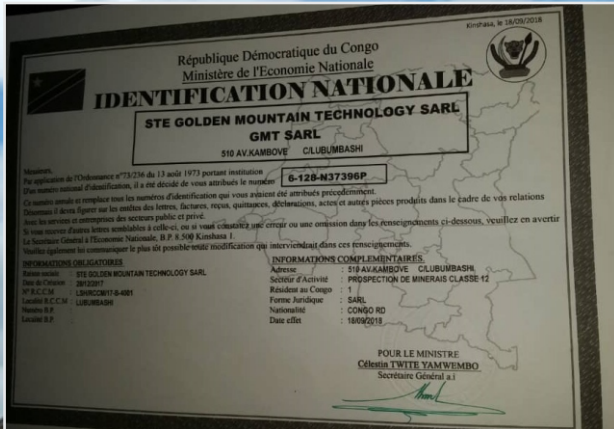

Cobalt is primarily used in lithium-ion batteries, and in the manufacture of magnetic, wear-resistant and high-strength alloys. The compounds cobalt silicate and cobalt(II) aluminate (CoAl_2O_4 , cobalt blue) give a distinctive deep blue color to glass, ceramics, inks, paints and varnishes.

Cobalt is an important source of gamma-rays. It is widely used in cancer treatment, as a tracer and for radiotherapy. Cobalt is found in the minerals cobaltite, skutterudite and erythrite. Important ore deposits are found in DR Congo.

PARTNERSHIP & INTERNATIONAL INVESTMENT

Golden Mountain Technology S.A.R.L is a reputable and legally registered company in the Democratic Republic of Congo. We have great investment in the mining industry.

We seek international partners to grow the company and grow their portfolio. We promise transparent negotiations and profit sharing. We bring on table copper mines, gold mines, cobalt mines, tantalite mines and Iron mines. If you are seeking to partner with us to grow the economy of the democratic Republic of Congo, please contact us.

AREAS OF INVESTMENT

Gold – gold mine equipment, gold exploration in the Congo, gold smelting, gold packaging and export from Congo

Diamond mining

Copper – We seek partnership to mine copper ores, building copper factories and exporting in metric tonnes. Copper from Congo is one of the best in the world.

Cobalt – Cobalt technology and exploration for cobalt production. Cobalt is used in batteries and electroplating in airplane engines.

Tantalite mines – Tantalum is used in alloys for strength and higher melting points in steel and glass. It has great high returns.

Iron – Iron mines in Congo are in Lubumbashi and are rich in iron ore. High quality iron ore. Invest your machines and equipment to increase production.
